About SNOMED International

Owned and governed by international Member countries, we are a not-for-profit organization that works on behalf of the healthcare system. We provide full support to our global Members and licensees, ensuring that our combined resources achieve significant shared benefits that resonate around the world.

We own, administer and develop SNOMED CT, a commercial product that enables us to establish semantically accurate clinical terminologies for consistent use across all health systems, services and products in the world.

Our Vision

By 2025, Clinical Terminologies will be used globally, which will result in better health and improved patient outcomes, supported by one language of health.

Our Mission

SNOMED International sustainably produces a global clinical vocabulary and other services that enables the clear exchange and analysis of health information for all.

About this catalog

The *2024 SNOMED International Products & Services Catalog* outlines all of our products and services in an easy-to-navigate format.

We have also identified the most common types of users of this catalog and highlighted the items that would be of most interest to them.

About SNOMED CT

SNOMED CT is the most comprehensive, multilingual, clinical health terminology in the world, containing over 350,000 active concepts. Developed for clinicians by clinicians, SNOMED CT is an integral part of many countries' digital health strategies and is maintained and quality assured to a high standard.

SNOMED CT is:

- the most comprehensive, multilingual clinical healthcare terminology in the world
- a resource with comprehensive, scientifically validated clinical content
- a product that enables consistent representation of clinical content in electronic health records
- mapped to other international standards
- used in more than eighty countries

OUR STRATEGY 2020-2025

Products and Services Goals

SNOMED CT Value Proposition

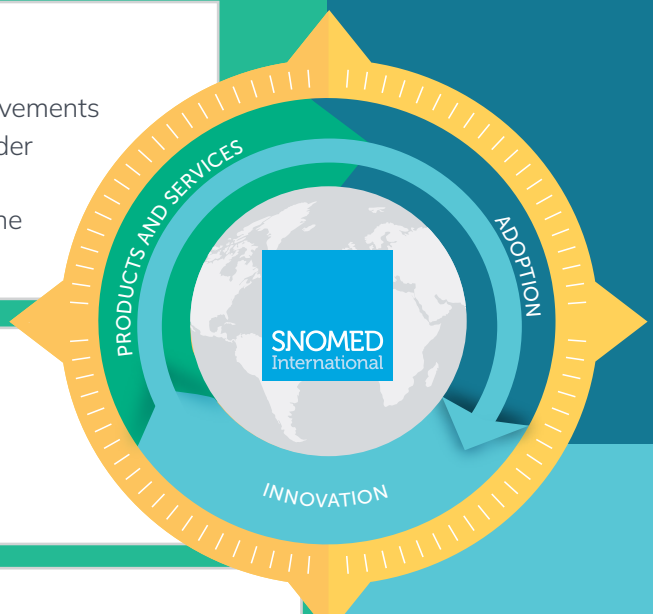

Extend the SNOMED CT value proposition to highlight improvements in patient outcomes and determine and validate all stakeholder benefits including integrating remuneration, research, public health information flows and semantic interoperability into the value proposition of SNOMED CT.

SNOMED CT Evolution

Evolve SNOMED CT to best serve improvements in patient outcomes and meet the needs of the integrated health and social care systems in a sustainable fashion.

Terminology Integrator

SNOMED CT will continue to be a hub that supports, facilitates and integrates terminology standards and classifications to help enhance and streamline the health and care ecosystem.

Adoption Goals

SNOMED CT Adoption & Consumption

Increase adoption and consumption of SNOMED CT for Members, suppliers, researchers and other SNOMED CT users by ensuring it is pragmatic, effective and verifiable.

SNOMED CT Implementation Support

Provide sustainable and approachable products and services to support the implementation of SNOMED CT.

Innovation Goal

Emerging Technologies

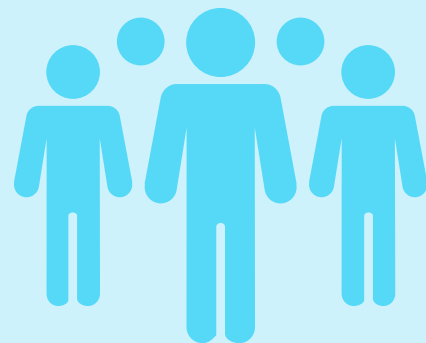

Leverage emerging technologies (e.g. Artificial Intelligence) to deliver value for stakeholders and drive efficiencies both at the point of care, across the organisation and the evolution of the product.

Our Customers & Stakeholders

Our numerous customers and stakeholders benefit in different ways from the use of SNOMED CT.

Members

- National licensing of SNOMED CT allows Members to ensure that high quality clinical information is available to all stakeholders.
- SNOMED CT enables broad use of information, including in health system management, clinical program management, public health and research.
- Richness of the information allows for proactive management of resources in the delivery of healthcare.
- Terminology use benefits the entire health system – savings of approximately 5% of total healthcare costs.

Policy Makers

- SNOMED CT accelerates the data analysis and decision-making process for Policy Makers so that patient outcomes and health system value can be improved.
- SNOMED CT allows Policy Makers to be more informed and accelerate policy and management decisions.

Collaboration Partners

- Collaboration Partners contribute their best-in-class clinical knowledge to ensure that SNOMED CT maintains its clinical integrity.
- Collaboration Partners, such as Professional associations and standards organizations, contribute their artefacts so that together with SNOMED CT, they can create one language of health.

Implementers

- For Implementers, SNOMED CT is the most comprehensive, scientifically validated, health care terminology available globally, allowing them to collect data once and reuse it for a diverse range of clinical, analytical and research purposes.
- SNOMED CT enables Implementers to support the information needs of a variety of stakeholders, including care providers, policymakers, patients/citizens and others.

Vendors

- SNOMED CT helps Vendors to sell their products using a global standard that is deployed in over 80 countries, and open up new markets for their software products.
- It can be implemented once and marketed on a global scale.
- SNOMED CT enables Vendors to implement a stable, multi-lingual, quality-assured, clinical terminology with a consistent release cycle.

Care Providers

- Developed by clinicians, SNOMED CT helps Care Providers access a comprehensive source of high-quality patient information and evidence to improve patient outcomes.
- When embedded in clinical information systems with point-of-care and population analytics, SNOMED CT enhances the quality and timeliness of the clinical data that is available to Care Providers to make patient care decisions.
- Using SNOMED CT, Care Providers can more easily share clinical information with both the extended healthcare team and patients, both locally and across borders.

Patients & Citizens

- SNOMED CT helps patients and citizens achieve better health by being more knowledgeable about their health and their self-care options.
- Through an informed and collaborative decision-making relationship with their Care Providers, Patients and Citizens can also select the best options for care.

Researchers & Knowledge Producers

- Leveraging the unique power of clinical concepts and defining relationships, SNOMED CT helps Researchers and Knowledge Producers integrate other classification schemes and quickly create data, information, evidence, and knowledge.
- SNOMED CT allows Researchers and Knowledge Producers to create 'a one language of health' and accelerate data, information, evidence and knowledge creation.
- SNOMED CT supports Researchers and Producers in a wide range of analytics and research activities to benefit the decision-making of policymakers, care providers, patients/citizens and other health care stakeholders.

Our Products & Services

Our core product is SNOMED CT.

SNOMED International also provides many other products and services to support the successful adoption of SNOMED CT globally.

SNOMED CT Content

SNOMED International provides content development, authoring and clinical quality assurance services for the International Release of SNOMED CT. In addition, our content services include the maintenance of key mappings with other standards and terminologies.

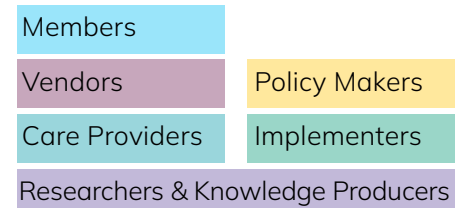

Monthly SNOMED CT International Release (English)

An international, comprehensive healthcare terminology

Benefits: Allows for consistent, up-to-date use and analysis of data internationally

Potential Customers:

* A license is required to use SNOMED CT.

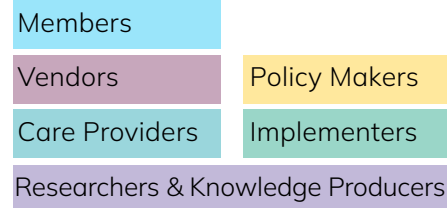

Bi-annual SNOMED CT Spanish Edition (Spanish)

An international, comprehensive, healthcare terminology translated to Spanish

Benefits: Allows for consistent, up-to-date use and analysis of data internationally

Potential Customers:

* A license is required to use SNOMED CT.

SNOMED CT 2023 releases

11

International Edition releases

15

Derivatives, freesets and refsets released

2

Spanish language releases

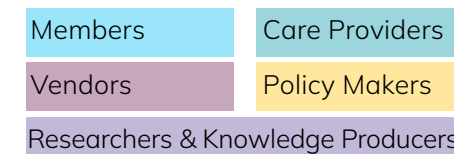

Mapping

One way and bi-directional maps from SNOMED CT to external classifications and terminologies include but are not limited to: ICD-10, ICD-11 MMS, ICD-O, GMDN, Orphanet and MedDRA

Benefits: Allows for interoperability between various terminologies and standards

Potential Customers:

Content Development

Professional authors continually develop SNOMED CT content; recent examples of content enhancements include: anatomy, cancer synoptic reporting, rare diseases, epilepsy and social care as well as an extension of SNOMED CT for the LOINC terminology

Benefits: Produces terminology that is concise and detailed to meet the requirements of priority content requested by our Members

Potential Customers:

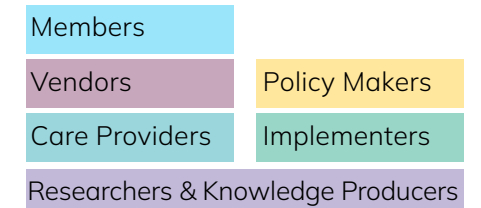

Subset Development

Development of subsets of SNOMED CT based on use cases

Benefits: Enables easier implementation of clinical specialty-focused content and supports standards interoperability

Potential Customers:

SNOMED CT Content

Content Partners + Collaborations = GLOBAL INTEROPERABILITY

Global Patient Set
Delivered By SNOMED International

Global Patient Set (GPS)

Managed collection of existing SNOMED CT reference sets released by SNOMED International. The GPS is comprised of unique identifiers, fully specified names, preferred terms in international English, and active/inactive status flags

Benefits: Provides a starting point for migration to the use of SNOMED CT, allows for managed exposure and use of SNOMED CT without requiring initial investment

Potential Customers:

- Vendors
- Implementers

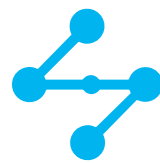

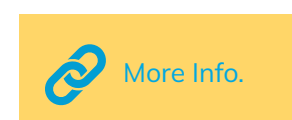

International Patient Summary (IPS) Terminology

Open product that can be used in healthcare solutions using the power of SNOMED CT through its query language and hierarchies for the specified scope

Benefits: Allows for more effective use of clinical data analytics and decision support, and for artificial intelligence applications.

Potential Customers:

- Vendors
- Care Providers
- Researchers & Knowledge Producers

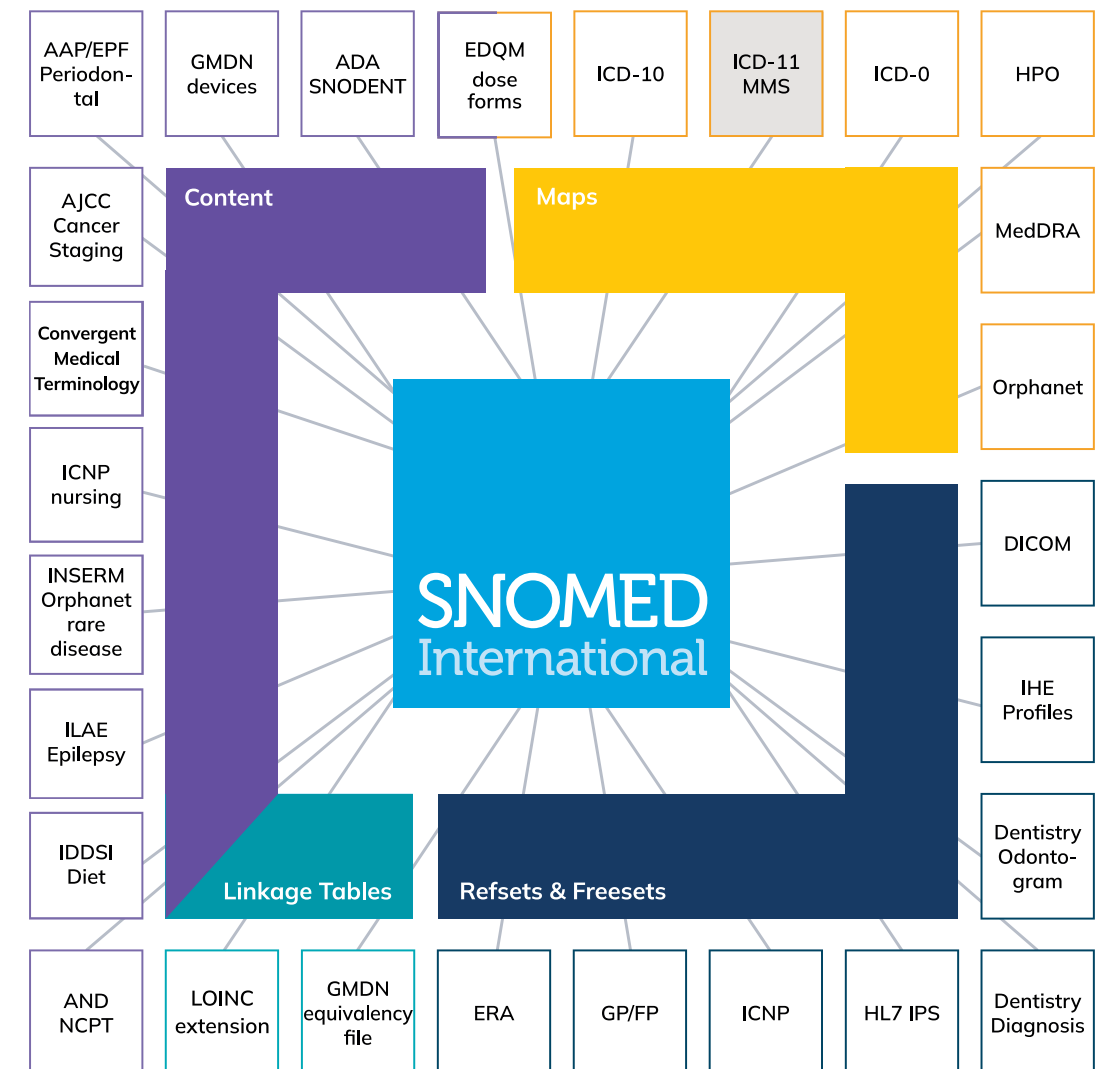

Content Collaborations

Linkages with external classifications and terminologies e.g., GMDN, ICNP, WHO

Benefits: Collaborations allows for interoperability between various terminologies and standards

Potential Customers:

- Members
- Care Providers
- Vendors
- Policy Makers
- Researchers & Knowledge Producers
- Collaboration Partners

Implementation Support

We provide direct support to implementers through the SNOMED CT adoption journey, from inception and strategy to deployment. This support is complemented by implementation resources, including documentation, training, and tooling.

SNOMED CT Demonstrators and Utilities

Collection of demonstration tools designed to support implementers of SNOMED CT

- Snolytical:** data analytics with SNOMED CT
- User Interface:** search and data entry with SNOMED CT
- Implementation Roadmap Generator:** create an implementation plan for SNOMED CT

Benefits: Shows ways that SNOMED CT can be effectively used and can be used in practice to support SNOMED CT implementation

Potential Customers:

[More Info.](#)

SNOMED CT Implementation Support Portal

Portal which offers a collection of resources and services to help you with your successful SNOMED CT implementation journey

Benefits: Provides a central source of SNOMED CT implementation resources

Potential Customers:

[More Info.](#)

Implementation Support Team

Team dedicated to providing assistance to implementations of SNOMED CT and developing resources to support implementers, including guidance and best practice demonstrations

Benefits: Provides assistance for implementers of SNOMED CT

Potential Customers:

[Contact us](#)

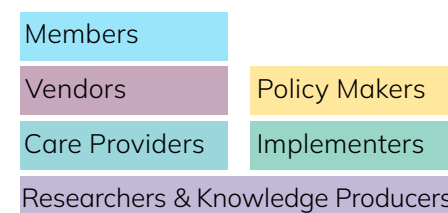

SNOMED in Action

Section on the snomed.org website that showcases SNOMED CT implementations and allows implementers to connect and leverage others' experience

Benefits: Shares SNOMED CT user experiences; allows visibility into SNOMED CT success stories

Potential Customers:

[More Info.](#)

Implementation Workshops

Customizable workshops on the topics of: implementation strategy, project planning, implementation assistance and next steps

Benefits: Provides a forum for your implementation team to explore their objectives, requirements, designs and questions with SNOMED CT experts.

Potential Customers:

[More Info.](#)

Implementation Maturity Framework

Five level model that can be used to categorize implementations based on a scale of increasing SNOMED CT capabilities

Benefits: Provides a methodology for assessing the current maturity level of a SNOMED CT implementation, helps plan for higher maturity levels

Potential Customers:

[More Info.](#)

Customer & Stakeholder Support

We provide customer and stakeholder support services to Members and Vendors as well as collaboration activities with external classification and terminology organizations.

Regional Customer Support Management

Dedicated Customer Relationship Executives in each region who provide support based on customer and stakeholder needs

Benefits: Enables customers and stakeholders with a direct contact to access support on a variety of SNOMED CT-related issues (e.g., implementation, licensing, access, contact with other members)

Potential Customers:

- Members
- Vendors
- Care Providers
- Policy Makers
- Implementers
- Researchers & Knowledge Producers

[Contact us](#)

Help Desk

Online help desk for queries regarding SNOMED CT

Benefits: Enables customers and stakeholders to get answers to questions electronically in a timely fashion

Potential Customers:

- Members
- Vendors
- Care Providers
- Policy Makers
- Implementers
- Researchers & Knowledge Producers

[Contact us](#)

Clinical Engagement

Liaison and resources for the global clinical community to support their use of SNOMED CT

Benefits: Provides a single point of contact for clinicians to access to support the clinical usage of SNOMED CT and tailored resources

Potential Customers:

- Care Providers

[More Info.](#)

Clinical Reference Groups/Clinical Project Groups

Open membership groups where clinicians from various specialties discuss and share knowledge

Benefits: Increases collaboration and knowledge sharing/brokering among SNOMED CT conversant clinicians, ensures clinical content remains current in SNOMED CT

Potential Customers:

- Care Providers

[More Info.](#)

Collaboration Support

Liaison which works with other standards organizations, including the development of joint deliverables, maps and linkages

Benefits: Allows for the interoperability between various terminologies or standards. Allows for SNOMED CT to grow and become more relevant to users

Potential Customers:

- Members
- Vendors
- Researchers & Knowledge Producers
- Care Providers
- Policy Makers
- Collaboration Partners

[Contact us](#)

Research Engagement

Forum for researchers and knowledge producers to discuss the use of SNOMED CT in research

Benefits: Provides the research community with access to global resources and ways to discuss SNOMED CT research

Potential Customers:

- Researchers & Knowledge Producers

[More Info.](#)

Customer & Stakeholder Support

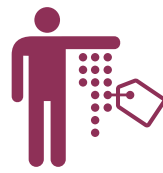

SNOMED CT Marketplace

Area of the snomed.org website where vendors of SNOMED CT products and services can exchange business information with potential purchasers

Benefits: Showcases vendor products and services, allows potential customers to see offerings available by region and scope of service

Potential Customers:

- Members
- Implementers
- Vendors

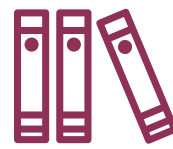

Vendor Engagement

Liaison and resources for the global vendor community to support the use of SNOMED CT in their products and services

Benefits: Provides a single point of contact for vendors to communicate requirements and issues to SNOMED International. Ensures the needs of vendors are addressed to allow for increased adoption

Potential Customers:

- Members
- Vendors

SNOMED CT Document Library

Collection of SNOMED CT documents, including introductory material, practical guides, technical specifications and reference material

Benefits: Assists with implementation and use of SNOMED CT. Provides editorial guidance to help ensure interoperability

Potential Customers:

- Members
- Care Providers
- Vendors
- Implementers
- Researchers & Knowledge Producers

Education

We provide online courses that are designed to enable users to learn more about SNOMED CT. We issue verifiable graded completion certificates to all those who have successfully completed our courses and met all course requirements, including having passed online assessments.

SNOMED CT Foundation Course (English)

Provides a basic level of SNOMED CT knowledge

Benefits: Gain foundational SNOMED CT knowledge; Prerequisite for more advanced courses, including the Implementation and Authoring Courses

Potential Customers:

- Members
- Vendors
- Care Providers
- Policy Makers
- Implementers
- Researchers & Knowledge Producers

[More Info.](#)

- Care Providers
- Vendors
- Researchers & Knowledge Producers

[Contact us](#)

SNOMED CT Terminology Services Course

Teaches the knowledge and skills needed to use SNOMED CT terminology services to search and retrieve SNOMED CT content

Benefits: Enables developers to learn how to use SNOMED CT terminology services

Potential Customers:

- Members
- Vendors
- Implementers
- Researchers & Knowledge Producers

[More Info.](#)

SNOMED CT Terminology Services Certification

A proctored exam that tests the competencies taught in the SNOMED CT Terminology Services Course

Benefits: Recognizes your competence in using a SNOMED CT terminology server to search and retrieve SNOMED CT content

Potential Customers:

- Members
- Vendors
- Implementers
- Researchers & Knowledge Producers

[More Info.](#)

SNOMED CT Implementation Course*

Teaches the knowledge and skills needed to implement the SNOMED CT aspects of a clinical system

Benefits: Provides knowledge and skills relevant to implementing a SNOMED CT enabled system

Potential Customers:

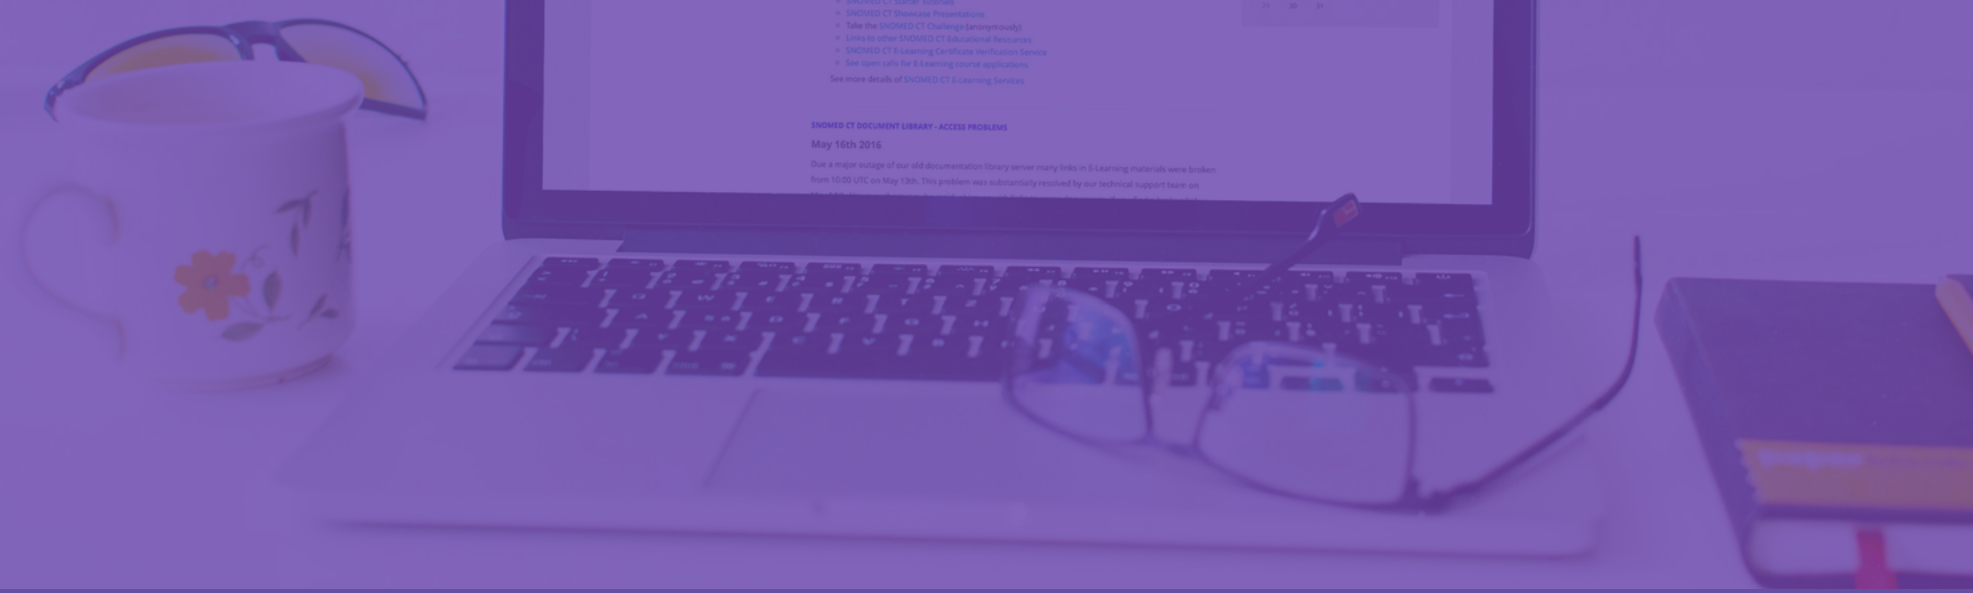

- Members
- Vendors
- Researcher & Knowledge Producers
- Care Providers
- Implementers

*SNOMED CT Foundation Course is a prerequisite

[More Info.](#)

Education

SNOMED CT Authoring Level 1 Course *

Teaches the knowledge and skills needed to perform basic SNOMED CT authoring tasks, and prepares for the Authoring Level 1 certification exam

Benefits: Enhances knowledge of the content development process, editorial guidelines and related topics, plus hands-on experience in authoring SNOMED CT content at an introductory level.

Potential Customers:

- Members
- Vendors
- Care Providers
- Researchers & Knowledge Producers

[More Info.](#)

SNOMED CT Authoring Level 1 Certification

Certification that recognizes your competence in performing basic SNOMED CT authoring tasks

Benefits: Certification demonstrates competency in these skills for employment or job prerequisites

Potential Customers:

- Members
- Vendors
- Care Providers
- Researchers & Knowledge Producers

[More Info.](#)

SNOMED CT Authoring Level 2 Course*

Helps experienced SNOMED CT authors to extend and develop their authoring skills and prepares for the Authoring Level 2 certification exam

Benefits: Provides advanced level learning about SNOMED CT authoring processes, tooling, editorial rules, description logic, content review and quality assurance

Potential Customers:

- Members
- Vendors
- Care Providers
- Researchers & Knowledge Producers

*This advanced course is available for those authors who are Authoring Level 1 certified.

[More Info.](#)

SNOMED CT Authoring Level 2 Certification

Optional certification that recognizes your competence in performing more advanced SNOMED CT authoring tasks

Benefits: Certification demonstrates competency in these skills for employment or job prerequisites

Potential Customers:

- Members
- Vendors
- Care Providers
- Researchers & Knowledge Producers

SNOMED CT for Clinicians Learning Pathway

Introduces the why, what and how of SNOMED CT to clinicians

Benefits: Builds knowledge about SNOMED CT and how it can be used to enhance clinical care

Potential Customers:

- Members
- Care Providers

[More Info.](#)

SNOMED CT for Data Analysts Learning Pathway

Provides a collection of learning resources designed to quickly learn how to use SNOMED CT for clinical data analysis

Benefits: Builds knowledge about SNOMED CT and how it can be used to enhance data analysis

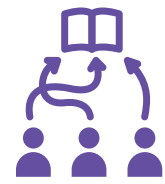

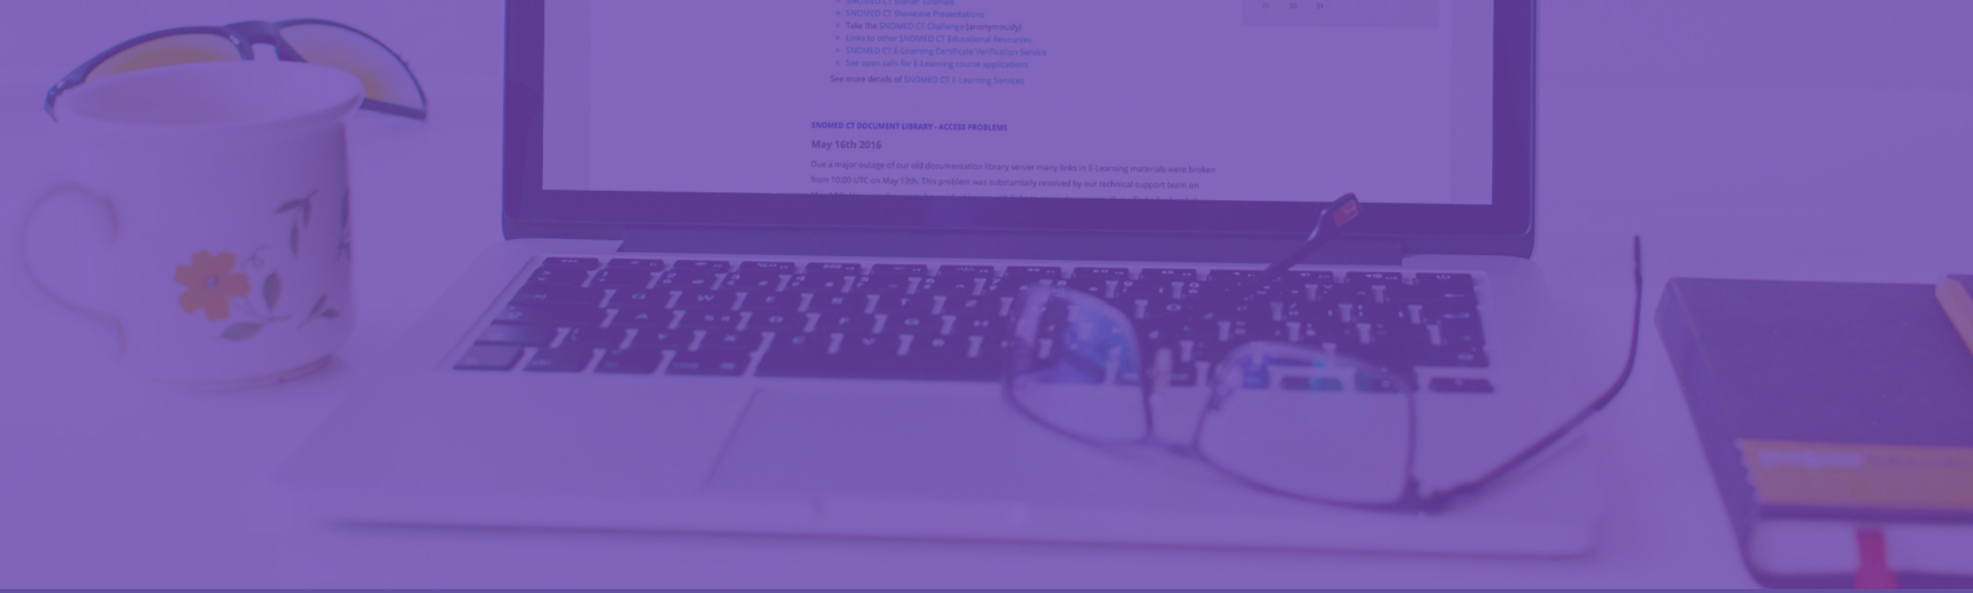

Potential Customers:

- Members
- Vendors
- Care Providers
- Researchers & Knowledge Producers

[More Info.](#)

Education

SNOMED CT for Developers Learning Pathway

Provides a collection of learning resources designed to help you quickly learn how to leverage SNOMED CT in software applications

Benefits: Builds knowledge about SNOMED CT and how it can be used to enhance software solutions

Potential Customers:

- Members
- Vendors
- Researchers & Knowledge Producers

[More Info.](#)

SNOMED CT for Translators Learning Pathway

Introduces SNOMED CT to translators and covers the common requirements to understanding SNOMED CT

Benefits: Builds basic SNOMED CT knowledge that a translator may require in performing translation

Potential Customers:

- Members
- Implementers

[More Info.](#)

Education Delivery Partners

Agreements with third party providers to deliver SNOMED CT certified education in other languages

Benefits: Enables non-English speakers to access SNOMED CT certified education in their own language

Potential Customers:

- Members
- Care Providers
- Vendors
- Implementers
- Researchers & Knowledge Producers
- Collaboration Partners

[More Info.](#)

Annual SNOMED CT Expo

International event with a program that features implementation, academic/ research and educational presentations about SNOMED CT

Benefits: Enables the SNOMED CT community to leverage the experience of others who use SNOMED CT

Potential Customers:

- Members
- Vendors
- Care Providers
- Policy Makers
- Implementers
- Researchers & Knowledge Producers
- Collaboration Partners

[More Info.](#)

Continuing Education Credits

Agreements with professional associations to endorse continuing professional development and national informatics recertification for specified SNOMED CT education programming

Benefits: Get credit for SNOMED CT education activities

Potential Customers:

- Members
- Care Providers
- Vendors
- Implementers
- Researchers & Knowledge Producers
- Collaboration Partners

[Contact us](#)

SNOMED CT Web Series

Clinical, Research and Implementation webinars that showcase SNOMED CT use and application globally

Benefits: Provides a free-of-charge opportunity to learn from global users of SNOMED CT, available live and on-demand.

Tooling

We develop and operate applications and platforms to support our products and services. All the source code of any noncommercial applications and platforms is open source and available to any stakeholder wishing to leverage the software in their own environment.

Release Management

TECHNICAL

Service to enable creation of a SNOMED CT RF2 release

Benefits: Produces quality assured release of SNOMED CT for the International Edition as well as its derivatives and Member editions and extensions. Stakeholders can leverage the open source code

Potential Customers:

Members

Refset Management & Translation Tool

TECHNICAL

Tool developed in open source code for searching for, creating, managing and translating SNOMED CT refsets

Benefits: Users of SNOMED are able to create and access refsets; Allows for translation of SNOMED CT into the Member countries' native languages to enable implementation activities; Stakeholders can leverage the open source code

Potential Customers:

Members	Implementers
Vendors	Care Providers
Researchers & Knowledge Producers	

Snowstorm Terminology Server

TECHNICAL

Snowstorm provides the API for the SNOMED International Browser including the International Edition and many Extensions. It can be used in local implementations to query SNOMED CT

Benefits: Open source terminology server that hosts multiple extensions alongside the International Edition of SNOMED CT. Allows multilingual search and content retrieval using both its own API and FHIR APIs

Potential Customers:

Members	Implementers
Vendors	Care Providers
Researchers & Knowledge Producers	

SNOMED CT Managed Service

TECHNICAL

Online service allowing SNOMED International Members to manage a release of a SNOMED CT local extension

Benefits: Enables users to operationalize their National Release Centre in a quick and effective manner

Potential Customers:

Members

MLDS Licensing Distribution Management

TECHNICAL

Tool that manages and distributes SNOMED CT editions and extensions

Benefits: Allows Members to license users quickly upon joining. Licenses for use by affiliates in non-Member countries can be issued centrally

Potential Customers:

Members

SNOMED CT Browser

CONTENT

Tool that allows browsing capabilities of releases and extensions

Benefits: Allows customers or potential customers to browse the terminology easily. Stakeholders can leverage the open source code

Potential Customers:

Members	Implementers
Vendors	Care Providers
Researchers & Knowledge Producers	

SNOMED CT Content Request Service (CRS)

CONTENT

Tool that allows users of SNOMED CT to request content changes

Benefits: Allows for the evolution of SNOMED CT based on users needs; Users can request updates and changes to the terminology and get status updates in an automated and timely fashion

Potential Customers:

Members

[More Info.](#)

Authoring Platform

CONTENT

Platform developed that allows Members and other stakeholders to author content

Benefits: Allows customers and stakeholders to author content. Stakeholders can leverage the open source code

Media Resources

Explore the Value of SNOMED CT

SNOMED CT Value

Amid competing priorities and scrutinized budgets, government decision makers are looking for qualitative and quantitative evidence to support their investments, including achieved outcomes and benefits narratives.

SNOMED International has developed an innovative Case for Investment that assembles a thoughtful collection of SNOMED CT case studies and also delivers real world examples of SNOMED CT across its varied uses.

SNOMED International complements updated stakeholder value propositions with the evidence that SNOMED CT adds measurable value to a broad range of primary and secondary processes that use SNOMED CT encoded data to deliver improved patient outcomes.

SNOMED CT is well positioned as a best-in-class clinical reference terminology to enable the semantic interoperability and knowledge representation of massive and diverse sets of data required by the next evolution in health care delivery.
